

Business Skills Assessment Tool

ASSESSMENT #1

Name _____

Date Taken _____

There are three levels of Practical Knowledge for each skill:

NONE: You have no knowledge of this skill.

SOME: You know something ... enough to know you could do it. Or enough to know that you should hire and supervise someone else to do it. And you would feel comfortable that you had a handle on the process and the result.

COMPETENT: You can do it, you like doing it, and you're good at it. Note: just because you can doesn't mean you should – even skills you are competent in may require you to hire someone else to do it depending on the size of your business and your workload.
